

NEMA project survey to assess the adoption of fisheries technologies

Under project of ICAR- New Extension Methodologies and Approaches, for assessing the composite carp culture technology developed by CIFA (Central Institute of Fresh water Aquaculture). Survey was conducted in various districts of Andhra Pradesh, during 10th to 12th December 2019 by the team of 5 members headed by Dr. Himanshu Kumar De, Principal Scientist, Department of Agril. Extension, CIFA. Meetings were conducted with farmers practicing composite carp culture with help of KVKs and allied departments and data regarding various aspects like cost of adoption of technology, financial status of farmer and impact of technology on livelihood of the farmers was collected in Kaikalur, Eluru and Bhimavaram. The survey data will be analyzed by ICAR- CIFA, Bhubaneswar to assess the spread of CIFA technologies for the development of fisheries.
